#1015 - SPEEDBOAT

Written by D.W. Fostle, 217 pages, hardbound. Wonderfully illustrated using the Rosenfeld Collection of wood powerboat photos. Traces the boats and the men that built and raced them from 1900 through 1955. Interesting stories on ram runners, the aircraft engine powered and super big race boats. We all loved this book! 3 1/2 pounds of history.

#1016 - SEARACE

Written by John O. Crouse, 675 pages, hardbound. This extremely well done book quickly moves through the early days of offshore power boats to do an incredibly interesting and thorough job of documenting the thrills and spills of offshore racing from 1955 through the late eighties. The excellent color photos go on and on. This is six pounds of fun!
